PERSONAL PROJECTS

Omnifood business website (09/2018 – Present)
- Responsive web design using media queries
- Optimised the performance of the site by; compressing images, minifying CSS and jQuery code
- Added smooth-scrolling and animation effects using jQuery
- Achieved cross-browser compatibility by using CSS prefixes

Portfolio website (09/2018 – Present)
- Added form functionality to the contact section using PHP
- New features and technologies are added as I develop my programming skills

EDUCATION

Responsive Web Design
FreeCodeCamp ⬀

07/2018 – 09/2018

Courses
- FreeCodeCamp's Responsive Web Design Certification covers an estimated 300 hours of coursework that involves web technologies such as; HTML5, CSS3, FlexBox, and CSS Grid. I completed hundreds of coding challenges along the way before building 5 responsive projects.
